I'm looking for an easy solution for a easy problem:

There are 4 speakers in my room, located in each edge of the room, like this:

1 2

3 4

Sometimes I'd like to have 1&3 to be left and 2&4 to be right.

Sometimes I wand 1&2 to be left and 3&4 to be right.

Switching should occur by a single mouseclick.

Is there a elegant way to get this done ? (Without midi automation.)
